

Barrel Clamps

Barrel Clamp - A Barrel Clamp is actually a mechanical or hydraulic accessory designed for a forklift. It could be utilized in order to clutch the item you would like to transport with the forklift and is often used for handling paper rolls, barrels, and kegs. Several types of barrel clamp attachments likewise have a revolving function. Like for example, the rotate function allows the individual operating the forklift to slot in a vertically stored paper inside the horizontal intake of a printing press.
