

JLG Forklift Parts

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove started on a cross country RV voyage. After spending many years establishing his family built crane business with his brother, John had no idea that this trip would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

Whilst on their trip, John spent time conversing with former business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John discovered a considerable marketplace for a product that could quickly and safely lift people in the air to accomplish maintenance and other construction services.

After returning from their holiday, John set up a partnership with two of his friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the simple design essentials of that original lift into existing models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has extended itself into a number of global markets and continues to cultivate new machines to ensure that customers are able to become safer and more resourceful within their workplace.
