

## Pulp Clamp

Pulp Clamp - There are actually lots of other forklift attachments which can be utilized so as to make lift trucks way more helpful. Snowplow attachments can be mounted onto the front part of a forklift. A scoop bucket could be useful if the job requires moving sand, gravel, soil or snow. A double block handler permits the forklift operator to pick up two loads and after that pile them beside each other. A lot of of those attachments are considered excellent for light to medium duty work.

One more lift truck accessory is the package lift clamp, that could carry and move heavier pallets. Moreover, pallet crane forks could be used to lift and move pallets with an overhead crane. A drum clamp attachment is useful for transferring really heavy drums from place to place with out having to use a pallet. Forklift mounted hoppers enable materials to be transferred and dumped with out having to handle it by hand. These hoppers when the bumper is released are self dumping.

There are even accessories obtainable that can transform the lift truck right into a commercial broom or mop. Such accessories are perfect for cleaning boat docks, warehouse flooring and parking areas. Forklift mounted platforms are accessible equipped with dual entry doors and can be connected in order to transport workers from one site to another. The mounted platform attachment is nice for reaching parts which are hard to access, particularly when you have products or supplies stored in out of the way areas or really up high.

It is a versatile alternative to install forklift attachments which could instantly transform a forklift truck right into a mobile crane unit. This particular equipment is really useful in terms of maneuvering loads which can be unstable or difficult. This attachment can either be telescopic, mounted on the carriage itself, or be attached or forklift mounted.
